

GP-4003-F07: Notice of a Contingency Gas Trigger Event

Notice of a Contingency Gas Trigger Event

Reference: National Gas Rules (NGR), Part 20, Division 8, Subdivision 2, Contingency Gas Trigger Event

Under rule 441 AEMO hereby provides notice of the following contingency gas trigger event and advises that the event is being triggered due to:

- NGR 440(1)(c) – an event upstream of an STTM distribution system that could reasonably be expected to adversely affect the supply of natural gas to that STTM distribution system

Under 440(2)(a) of the NGR, AEMO has been notified of a contingency gas trigger event at 15:00 hrs AEST (16:00 hrs AEDT) on 28/10/2023.

The Sydney STTM hub is subject to a contingency gas trigger event effecting gas supply on the EGP.

AEMO will proceed to convene a CG assessment conference with Sydney STTM facility operators and STTM distributor/s to assess the contingency gas trigger event.

Issued on 28/10/2023
