

## Notice of a Contingency Gas Trigger Event

### Notice of a Contingency Gas Trigger Event

Reference: National Gas Rules (NGR), Part 20, Division 8, Subdivision 2, Contingency Gas Trigger Event

Under rule 441 AEMO hereby provides notice of the following contingency gas trigger event and advises that the event is being triggered due to:

- NGR 440(1)(d) – AEMO issues an ex ante market schedule or a provisional schedule for a hub for a gas day which indicates that price taker bids will not be fully scheduled due to inadequate supply of natural gas to that hub on that gas day

Under 441(1)(b) of the NGR, AEMO has determined that a contingency gas trigger event has occurred at 09:40 hrs AEST on *25/05/2022*.

The Sydney STTM hub is subject to a contingency gas trigger event effecting gas supply to NETSYD.

AEMO will proceed to convene a CG assessment conference with Sydney STTM facility operators and STTM distributor/s to assess the contingency gas trigger event.

Issued on *25/05/2022*
